

The Perfect Flavor Solution for Brewed Tea

FDI proudly presents Flavorcoat®, our new line of Natural and N/A encapsulated fruit and spice flavors specifically designed for hot teas. Using a special encapsulation process, we have custom-designed this line to be the perfect size and bulk density for mixing in the tea bag with cut tea while maximizing shelf stability and topnote retention – all offered with Flavor Dynamics low minimum orders, competitive pricing and excellent service.

Encapsulated for Processing and Packaging Convenience

Flavorcoat®'s unique encapsulation process gives it many advantages for hot tea flavoring. The particles of a Flavorcoat® flavor are resilient enough to undergo the rigors of the tea-bag filling process, resist clumping in the tea bag due to excessive moisture, mix exceedingly well with cut tea and resist segregation in tea due to vibration during packaging and shipping.

Our Special Process Creates Flavors That:

- are the perfect size and bulk density for blending with cut tea.
- resist segregation in tea due to vibration during packaging and shipping.
- are perfect for tea bag applications.
- retain their topnotes and light volatiles.
- are resilient enough to undergo the rigors of processing and packaging.
- resist clumping in tea due to excessive moisture.
- blend more cleanly than other flavoring solutions, increasing production efficiency and reducing downtime.
- come in several delicious varieties.
